

Learning about Life

Our children learn about themselves and others through our **SEAL** (Social Emotional Aspects of Learning) in class and in assemblies. This curriculum help pupils develop their own self-image, learn **social skills** and develop **better understanding of others**. We also teach our children to have positive approaches to life and their studies through **Growth Mind-set** theories.

Our Key Stage 2 pupils also learn more about getting on with others through **Conflict Resolution** training. Some pupils will go on to be Peer Mediators and are trained by staff to help pupils resolve their problems with each other.

We encourage pupils to be able to engage with each other in discussions through **“Tummy Talk”** and **“Philosophy for Children”**

We feel that our combination of strategies enables pupils to develop into **confident** individuals that are **caring, respectful and tolerant**. We feel we teach them skills for **successful and happy** lives alongside **academic success**.
